SUBJECT INDEX

Advanced practice nursing
Anemias: Road signs to the real problems, (3):2.
Assessing and managing the patient with headaches, (3):15.
Managing febrile seizures in children, (5):2.
Recognizing the various presentations of appendicitis, (3):24.
Six critical thinking skills for at-the-bedside success, (2):30.
The etiology of thrombocytopenia, (4):10.

Assessment
Acute ischemic stroke, (2):14.
Anemias: Road signs to the real problems, (3):2.
Assessing and managing the patient with headaches, (3):15.
Caring for the woman with migraine headaches, (4):17.
How to manage burn emergencies, (4):2.
How to respond to shock, (2):22.
Recognizing the various presentations of appendicitis, (3):24.
Take the wind out of asthma, (1):2.
The etiology of thrombocytopenia, (4):10.
Malnutrition in the elderly: What nurses need to know, (6):28.

Cardiovascular diseases
Acute ischemic stroke, (2):14.
Beta-blocker therapy for hypertension, (2):2.
Carvedilol: A countermeasure to heart failure, (5):11.
Current therapies in the management of systolic and diastolic dysfunction, (6):2.
The role of beta-blockers in the management of patients with heart failure, (1):24.

Cardiovascular nursing
Bed rest after percutaneous transluminal coronary angioplaty: How much is enough? (4):46.
Current therapies in the management of systolic and diastolic dysfunction, (6):2.

Ground zero: Building a cardiac surgery program, (4):26.
Head of bed elevation, early walking, and patient comfort after percutaneous transluminal coronary angioplasty, (3):44.
How to respond to shock, (2):22.
Tenecteplase: A promising new fibrinolytic agent, (6):19.
The effects of an advanced practice nurse-directed heart failure program, (5):20.

Closing Word (editorial)
A ladder or a tree? (5):56.
Antibiotic resistance: Time to fight back, (3):56.
Bioterrorism: The new threat, (6):48.
Dealing with medical futility, (1):56.
Education: The key to retention, (4):56.
Finding a common ground, (2):56.

Communication
Communicating to get results: An interview with Jacob Weisberg, (6):24.
How a work group facilitator can help units reach goals, (4):34.

Critical Questions department
Nurses and informed consent, part 1, (1):33.
Nurses and informed consent, part 2, (2):28.
Parents in conflict, trouble at the top, (4):39.
Patients on hold, granting a stay, in a state of wonder, (5):35

Diagnostic studies
Comparing tympanic membrane and pulmonary artery catheter temperatures, (2):44

Drugs
Beta-blocker therapy for hypertension, (2):2.
Carvedilol: A countermeasure to heart failure, (5):11.
Celecoxib (Pharmacy & Therapeutics department), (2):13.
Fomepizole (Pharmacy & Therapeutics department), (5):29.
Fosphenytoin (Pharmacy & Therapeutics department), (3):12.
Propofol (Pharmacy & Therapeutics department), (1):15.
Tenecteplase: A promising new fibrinolytic agent, (6):19.
The role of beta-blockers in the management of patients with heart failure, (1):24.

Education STATPack
Anemias: Road signs to the real problems, (3):11.
Beta-blocker therapy for hypertension, (2):10.
Current therapies in the management of systolic and diastolic dysfunction, (6):13.
How to manage burn emergencies, (4):9.
Managing febrile seizures in children, (5):10.
Take the wind out of asthma, (1):12.

Emergency nursing
Acute ischemic stroke, (2):14.
Braced for disaster, (6):35.
Dealing with coagulopathies of pregnancy-induced hypertension, (6):14.
Family advocates: Caring for families in crisis, (1):36.
How to manage burn emergencies, (4):2.
How to respond to shock, (2):22.
Recognizing the various presentations of appendicitis, (3):24.
Take the wind out of asthma, (1):2.
What nursing has learned from famous traumas, (5):17.

Equipment and supplies
A guide to pediatric equipment, (1):23.
Comparing tympanic membrane and pulmonary artery catheter temperatures, (2):44
Should continuous lateral rotation therapy replace manual turning? (1):42.

Infection control
Measuring "hang time": Contamination of intra-arterial flush solutions over time, (6):38.
The bloodborne pathogens standard, 2001: What's changed? (5):44.

Interprofessional relations
Evaluating a nurse practitioner service, (5):30.
Ground zero: Building a cardiac surgery program, (4):26.
The effects of an advanced practice nurse-directed heart failure program, (5):20.

Legal aspects of nursing
Nurses and informed consent, part 1 (Critical Questions department), (1):33.
Nurses and informed consent, part 2 (Critical Questions department), (2):28.
Professional boundaries: Staying in the lines, (5):36.
The bloodborne pathogens standard, 2001: What's changed? (5):44.

Neurologic nursing
A multidisciplinary care approach to Guillain-Barré syndrome, (1):16.
Acute ischemic stroke, (2):14.
Assessing and managing the patient with headaches, (3):15.
Caring for the woman with migraine headaches, (4):17.

Nurse/patient relations
Communicating to get results: An interview with Jacob Weisberg, (6):24.

Nursing as a profession
What nursing has learned from famous traumas, (5):17.

Nursing management
Communicating to get results: An interview with Jacob Weisberg, (6):24.
Evaluating a nurse practitioner service, (5):30.
Ground zero: Building a cardiac surgery program, (4):26.
How a work group facilitator can help units reach goals, (4):34.
Need critical care nurses? Inquire within, (1):30.
Six critical thinking skills for at-the-bedside success, (2):30.
The loyal treatment: How dedicated employees benefit managers and organizations, (3):28.
Using variance tracking to improve outcomes and reduce costs, (2):34.

Nutrition
A transitional feeding protocol for critically ill patients, (5):46.
Anemias: Road signs to the real problems, (3):2.
Malnutrition in the elderly: What nurses need to know, (6):28.

Patient-care planning
Bed rest after percutaneous transluminal coronary angioplaty: How much is enough? (4):46.
Head of bed elevation, early walking, and patient comfort after percutaneous transluminal coronary angioplasty, (3):44.
Should continuous lateral rotation therapy replace manual turning? (1):42.

Patients' families
Family advocates: Caring for families in crisis, (1):36.

Pediatric nursing
A guide to pediatric equipment, (1):23.
Managing febrile seizures in children, (5):2.
Take the wind out of asthma, (1):2.

Pharmacy & Therapeutics department
Celecoxib, (2):13.
Fomepizole, (5):29.
Fosphenytoin, (3):12.
Propofol, (1):15.

Procedures
A transitional feeding protocol for critically ill patients, (5):46.
Measuring "hang time": Contamination of intra-arterial flush solutions over time, (6):38.

Professional development
Critical care nursing orientation in the rural community hospital, (4):40.
Guide to nursing organizations 2001, (3):38.
Guide to specialty certification, (5):41.
Need critical care nurses? Inquire within, (1):30.
Plunging into preload and afterload, (3):32.
Professional boundaries: Staying in the lines, (5):36.
Six critical thinking skills for at-the-bedside success, (2):30.
Tips for succeeding at Internet courses, (3):42.

Respiratory nursing
A multidisciplinary care approach to Guillain-Barré syndrome, (1):16.
Should continuous lateral rotation therapy replace manual turning? (1):42.
Take the wind out of asthma, (1):2.
